Seasonally Adjusted and Unadjusted Data

(Including unadjusted data on imports of petroleum and petroleum products)

UNIV. OF FL LIB. DOCUMENTS DEPT. U.S. DEPOSITORY

JUN 2 1986

SPECIAL NOTICE

REVISED 1985 STATISTICAL MONTH AND MONTHLY CARRY-OVER DATA AVAILABLE

The totals, trade balance, analytical text, and tables 1A, and 2 to 5 of Report FT900ADV are based on information compiled for the current statistical month instead of the revised statistical month or actual (transaction) month. Revised 1985 statistical month information is shown in table 1B and in APPENDICES 1 and 2. See the "Explanation of Statistics" for information on definitions of statistical month and monthly carryover; and general methodological changes and recompilation policy for the prior and current year statistics.

In November, carry-over amounted to $12.6 billion or 40.3 percent of the November monthly unadjusted total for imports and $1.7 billion or 9.7 percent for exports. In October the totals included carry-over amounting to $10.4 billion or 35.0 percent of the October monthly unadjusted total for imports and $1.4 billion or 8.0 percent for exports. See the "Explanation of Statistics" and Appendices 1 and 2 for additional information on monthly carry-over. We do not know, at this time, what effect carry-over has on Customs value import totals. The effect of carry-over on the detailed commodity and country data for both imports and exports has not been determined. The Census Bureau is exploring publication of import Customs value totals and detailed monthly import and export figures for a revised statistical and/or actual month. A final decision will be based on user needs and cost considerations.

F.A.S. EXPORTS AND CUSTOMS IMPORTS

Seasonally Adjusted[1 2 3]

The Bureau of the Census, Department of Commerce, announced today that during November 1985, exports on a f.a.s. (free alongside ship) U.S. port of exportation value basis, excluding Department of Defense (DOD) Military Assistance Program Grant-Aid shipments, amounted to $17,975.5 million and that general imports on a Customs value basis, amounted to $30,285.1 million.

Based on the above export and import figures, the November merchandise trade balance was in deficit by $12,309.6 million.

During the first 11 months of 1985 (January-November), exports were at an annual rate of $214,083 million or about 2 percent less than the calendar year 1984 total of $217,865 million. Imports during January-November were at an annual rate of $341,643 million or about 5 percent above the $325,726 million calendar year 1984 total.

For the 4-month period, August-November 1985, exports averaged $17,624.8 million per month, or about 1 percent above the $17,510.6 million average reported for the preceding 4-month period, April-July 1985. Customs value imports averaged $28,931.7 million per month for the current 4-month period, a level about 2 percent more than the $28,258.8 million average reported for the preceding 4-month period.

Unadjusted

Exports excluding Military Assistance Program Grant-Aid shipments increased to $17,720.0 million in November from $17,617.7 million in October. General imports increased to $30,010.4 million in November from $28,429.4 million in October.

F.A.S. EXPORTS AND C.I.F. IMPORTS

Seasonally Adjusted[1 2 3]

Exports on a f.a.s. U.S. port of exportation value basis, excluding Department of Defense (DOD) Military Assistance Program Grant-Aid shipments amounted to $17,975.5 million in November 1985 and general imports on a c.i.f. (cost, insurance and freight) value basis, amounted to $31,657.4 million. These figures were reported by the Bureau on December 31, 1985.

Based on the above export and import figures, the November merchandise trade balance was in deficit by $13,681.9 million.

During the first 11 months of 1985 (January-November), exports were at an annual rate of $214,083 million or about 2 percent less than the calendar year 1984 total of $217,865 million. Imports during January-November were at an annual rate of $357,870 million or about 5 percent above the $341,177 million calendar year 1984 total.

For the 4-month period, August-November 1985, exports averaged $17,624.8 million per month, or about 1 percent above the $17,510.6 million average reported for the preceding 4-month period, April-July 1985. The c.i.f. value imports averaged $30,271.8 million per month for the current 4-month period, a level about 2 percent more than the $29,620.6 million average reported for the preceding 4-month period.

Unadjusted

Exports excluding Military Assistance Program Grant-Aid shipments increased to $17,720.2 million in November from $17,617.7 million in October. General imports increased to $31,371.8 million in November from $29,695.1 million in October.

Footnotes 1, 2, and 3 are shown at the bottom of page 5.

U.S. Department of Commerce

BUREAU OF THE CENSUS

Inquiries should be addressed to the Chief, Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Tel: Area Code 301, 763-5140; 763-7755.

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Postage stamps not acceptable; currency submitted at sender's risk. Remittance from foreign countries must be by international money order or by draft on a U.S. bank. Annual subscription, FT900, 975, 985, and 986 combined $55.00 ($68.75 for foreign mailing), single issue $2.25 ($2.85 for foreign mailing).

EXPLANATION OF STATISTICS

COVERAGE

The U.S. foreign trade statistics include, in general both government and nongovernment shipments of merchandise and reflect the physical movement of foreign trade shipments into and out of U.S. Foreign Trade Zones, the U.S. Virgin Islands and the U.S. Customs territory (includes the 50 states, the District of Columbia, and Puerto Rico), with certain exceptions. The statistics exclude data on shipments between the United States, Puerto Rico, and U.S. possessions, shipments to U.S. Armed Forces and diplomatic missions abroad for their own use, American goods returned to the United States by its Armed Forces and intransit shipments. (See paragraph below regarding sources of further information.)

STATISTICAL MONTH AND REVISED STATISTICAL MONTH INFORMATION

Statistical month data reflect the compilation of import entries and export declarations transmitted to the Census Bureau for processing during a monthly processing period of 20 to 22 days duration, which begins with the 15th of the preceding month and ends with the 15th of the following month. These records cover transactions that occurred on different dates prior to the 15th day of the processing month (i.e. in the immediately preceding month or earlier). Revised statistical month data are recompilations. During the recompilation, records are grouped and totaled by their transaction dates. Some estimates for transactions expected to be compiled are included in the revised statistical month data. See APPENDICES 1 and 2.

MONTHLY CARRY-OVER

Both the import and export monthly trade totals reflect the dollar value reported on import entries and export declarations transmitted by the U.S. Customs Service to the Census Bureau within 15 days of the end of the statistical month. While a number of factors account for import and export carry-over, it is caused principally by late transmittal of statistical documents to the Census Bureau. The Customs procedure which allows importers to file import documentation up to 10 workdays after the date of release of the merchandise may result in additional import carry-over. Documents received too late for inclusion in the appropriate statistical month, are carried over to the next statistical month.

METHODOLOGICAL CHANGES

Recent analysis by the Census Bureau designed to quantify the effect of carry-over showed that (1) the level of carry-over is high and (2) the carry-over has varied widely from month to month. This requires that we reemphasize our cautionary statement regarding the use of monthly trade figures particularly with respect to month-to-month change. Users are advised that cumulations of data over at least 4-month periods are desirable to identify underlying trends and minimize the effect of irregular trade movements and monthly carry-over.

The level and volatility of the carry-over, particularly with respect to imports, has reached a magnitude that not only necessitates greater caution in interpreting month-to-month changes, but also requires a change in methodology designed to more accurately reflect trade for a given month. These changes are discussed in the following sections.

RECOMPILATION POLICY FOR PRIOR STATISTICAL YEAR

Actual aggregate monthly import, export, and trade balance figures will be recompiled on an annual basis. We have already recompiled aggregate monthly import, export and trade balance figures for 1984. The 1984 recompiled figures were issued in 4 Appendices to the August 1985 statistical month report FT900ADV dated September 27, 1985. The recompiled 1984 figures reflect the actual month of entry for imports and month of shipment for exports.

The actual 1984 data appearing in the Appendices reflect transactions through the June 1985 statistical month only and are available upon request to the Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. The tables show that the differences between statistical month and actual aggregate trade data are very small over the whole year. The actual 1984 imports were $346.4 billion compared to $341.2 billion reported on a statistical month basis, a difference of about one and one half percent. Exports were $218.7 billion compared to $217.9 billion, a difference of less than half a percent. The actual merchandise trade deficit for the year was $127.6 billion compared to $123.3 billion. There is the possibility of additional late documents being transmitted to the Census Bureau for processing particularly for imports. The amount of carry-over value compiled from such documents is likely to be infinitesimal when compared to the previously announced actual calendar year 1984 total. For example, 1984 transactions processed with September 1985 statistical month amounted to less than 0.005 percent of the calendar year total.

RECOMPILATION POLICY FOR CURRENT STATISTICAL YEAR (Revised Statistical Month)

In order to provide users with monthly figures that have a substantially reduced amount of carry-over, we will publish revised aggregate information in the following month. The "revised statistical month" reduces the carry-over from between 39 and 55 percent to between 6 and 18 percent for imports and from between 6 and 13 to less than 2 percent for exports. The "revised statistical month" will include data for all documents received within 45 days after the end of the month, and is calculated by combining the current month value in that statistical month with the value of the carry-over included in the subsequent statistical month. For example, the revised statistical figure for August consists of actual August transaction included in August and September statistical months plus a small additional carry-over from earlier months.

Each month we will revise the previous statistical month's figures in this manner and publish the revised figures in an appendix to this report. For most months, it improves the numbers (brings them closer to the actuals). There are exceptions and the review of 1984 aggregates shows that November and December are particularly troublesome when compared with the actuals. The problem here seems to be associated with the variability of the carry-over, and by working with the U.S. Customs Service we hope to reduce both the level and variability. If these efforts are not completely successful, it may necessitate some other revision technique for year end information.

We do not know, at this time, what the effect of the carry-over is on detailed commodity and country data. The Census Bureau is exploring publication of detailed monthly figures for the revised statistical month and/or for the actual month data. A final decision about publication of detailed figures will be based on uses of the data and cost considerations.

EXPLANATION OF STATISTICS—Continued

VALUATION OF IMPORTS AND EXPORTS

Customs Import Value

The Customs value reflects the value of imports as appraised by the U.S. Customs Service in accordance with the legal requirements of the Tariff Act of 1930, as amended (most recently by the Trade Agreements Act of 1979). This Customs value as amended by the Trade Agreements Act of 1979, is generally defined as the price actually paid or payable for merchandise when sold for exportation to the United States, excluding U.S import duties, freight, insurance, and other charges incurred in bringing the merchandise to the United States. In the case of transactions between related parties, the relationship between buyer and seller should not influence the Customs value. In the case of overland shipments originating in Canada only, the Customs value generally does not include costs incurred in bringing the merchandise from the interior point of origin to the Canadian border point.

C.I.F. Import Value

The c.i.f. value consists of the Customs value as defined above, plus all freight, insurance, and other charges (excluding U.S. import duties) incurred in bringing the merchandise from the country of exportation to the first port of arrival in the United States. Prior to January, 1982 statistics, such costs and charges were added to the arms-length value in order to compile the c.i.f. value. In conformity with Section 301 (e) of Title 13, United States Code, general imports, c.i.f. value basis, are reported at least 48 hours in advance of general imports, Customs value basis. Report FT900 Advance, is the initial statistical month report.

F.A.S. Export Value

The value reported in the export statistics generally is equivalent to an f.a.s. (free alongside ship) value at the U.S. port of export, based on the transaction price, including inland freight, insurance and other charges incurred in placing the merchandise alongside the carrier at the U.S. port of exportation.

EXPORT AND IMPORT COMMODITY INFORMATION

The commodity information presented in those tables showing imports of petroleum and selected petroleum products is in terms of the classifications in the Tariff Schedules of the United States Annotated (TSUSA). The remaining tables present commodity information in terms of Schedule E and Schedule A, both of which are based on the Standard International Trade Classification (SITC), Revision 2. The descriptions for Schedule E commodity section totals and the Schedule A commodity section totals are as follows: 0. Food and live animals; 1. Beverage and tobacco; 2. Crude materials, inedible, except fuels; 3. Mineral fuels, lubricants, and related material; 4. Oils and fats-animals and vegetable; 5. Chemicals and related products, N.S.P.F.; 6. Manufactured goods classified chiefly by material; 7. Machinery and transport equipment; 8. Miscellaneous manufactured articles, N.S.P.F.; and 9. Commodities and transactions not classified elsewhere. Information concerning the export and import commodity groupings may be obtained from the Foreign Trade Division.

SOURCES OF FURTHER INFORMATION

Additional foreign trade statistics and information regarding coverage, valuation, sampling, and qualifications which should be considered by users of the statisitics are contained primarily in the following publications: Report FT990, Highlights of U.S. Export and Import Trade; FT135, U.S. General Imports, Schedule A Commodity by Country; FT410, U.S. Exports, Schedule E Commodity by Country; and the Guide to Foreign Trade Statisics. Information regarding additional sources of statistics, the methodology used in seasonally adjusting the data, and other matters relating to foreign trade statistics may be obtained from the Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233.

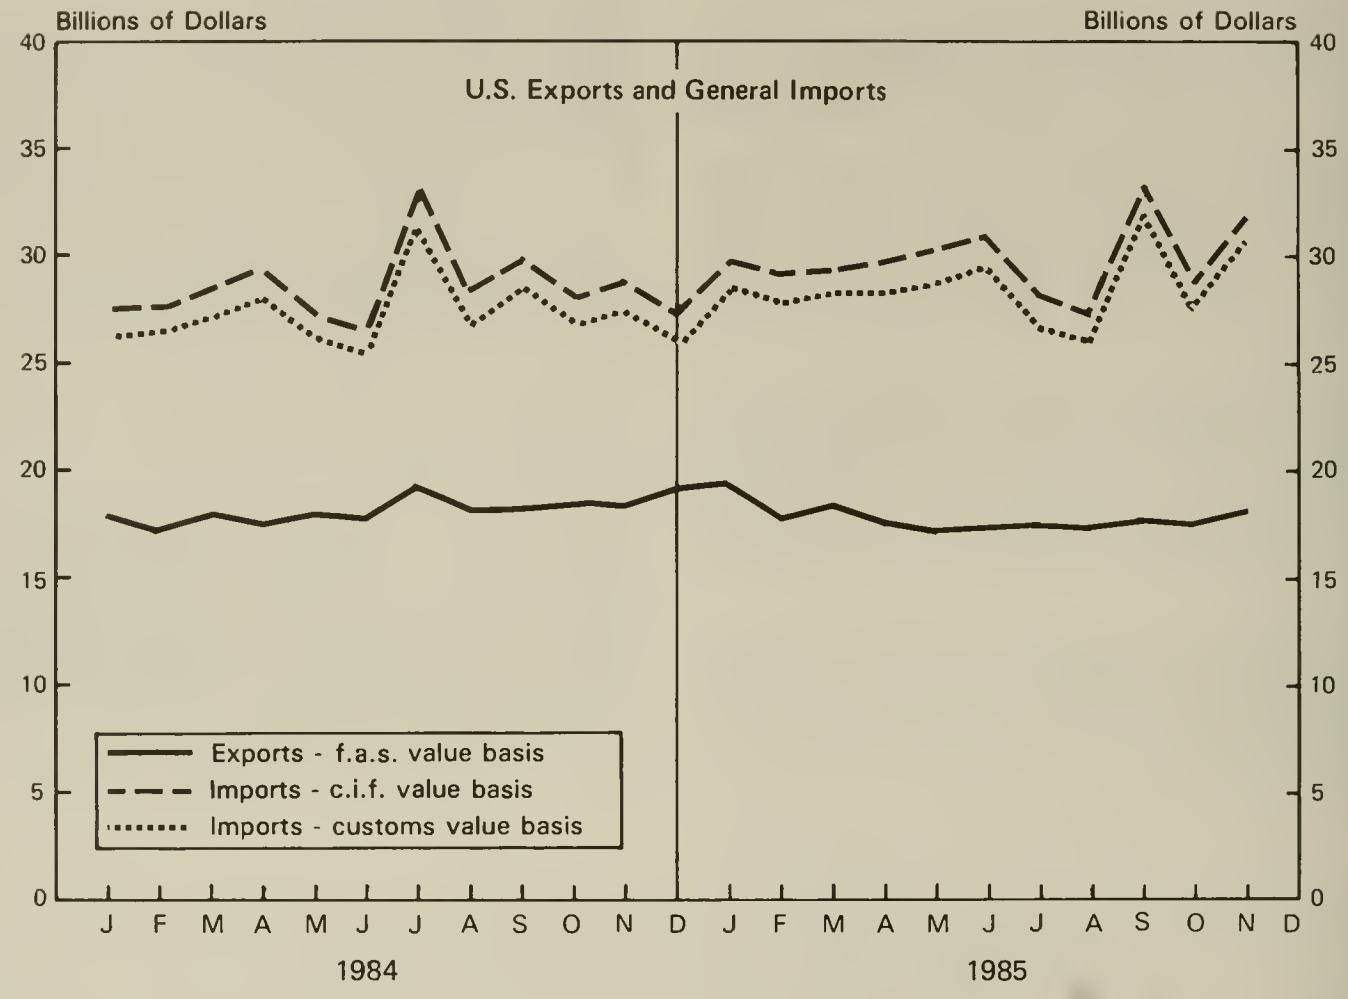
SPECIAL NOTICE

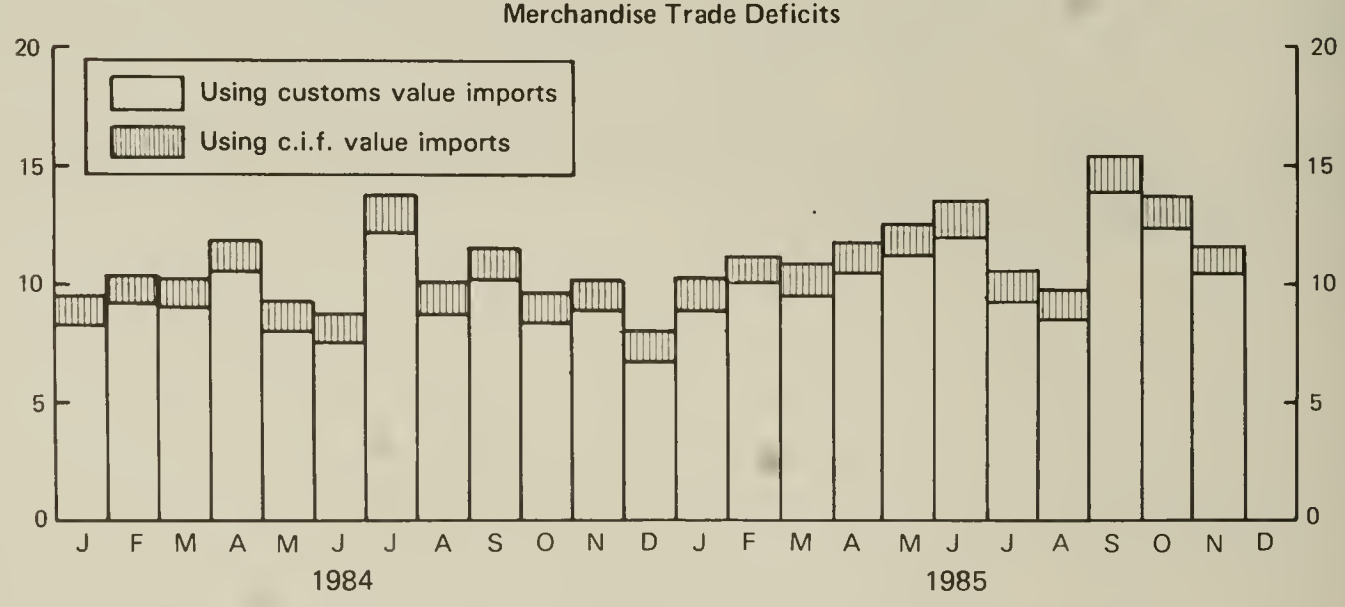
SEASONAL ADJUSTMENT POLICY CHANGES

Effective with January 1986 statistical month, the import and export merchandise trade data will be published only on an unadjusted basis. The policy of applying seasonal and working-day factors to commodity components, commodity groupings, and selected country/area groupings, for the individual statistical months, will be discontinued. The extent of carry-over, particularly for the import data, and the variability of the volume of carry-over for each month's statistics obscures the true cyclical or seasonal patterns in the data and prevents accurate seasonal and working-day adjustment. This change in policy which permits the issuance of unadjusted merchandise trade data on a current statistical month basis is in line with the recently introducted recompilation policy under which revised statistical month and actual month data are being published. The Bureau of the Census would welcome any comments or suggestions relating to the formats of the statistical tables used in the presentation of the trade data shown in this release.

U.S. Exports, General Imports, and Merchandise Trade Deficits

Seasonally Adjusted Data by Statistical Month: 1984 - 1985





NOTE: Exports represent shipments of domestic and foreign merchandise combined, excluding Department of Defense (DOD) Military Assistance Program Grant-aid shipments, on a f.a.s. (free alongside ship) U.S. port of exportation value basis. General imports are a combination of entries for immediate consumption; entries into Customs bonded warehouses and entries into U.S. Foreign Trade Zones on a c.i.f. (cost, insurance, and freight) U.S. port of entry value basis and Customs value basis. The merchandise trade deficits are the results of total imports exceeding total exports.

TABLE 1A. EXPORTS, GENERAL IMPORTS, AND MERCHANDISE TRADE BALANCE BY STATISTICAL MONTH: JANUARY 1984 to NOVEMBER 1985

In millions of dollars. Exports are domestic and foreign merchandise combined, excluding Department of Defense (DOD) Military Assistance Program Grant-Aid shipments, f.a.s. (free alongside ship) U.S. port of exportation value basis. General imports are a combination of entries for immediate consumption; entries into Customs bonded warehouses and entries into U.S. Foreign Trade Zones on a c.i.f. (cost, insurance, freight) U.S. port of entry and Customs value bases. Monthly totals are adjusted for seasonal and working-day variation, but not for changes in price level. Monthly trade balance is based on the seasonally adjusted totals; the January-December (calendar year) totals and trade balances are unadjusted and do not represent the sum of the monthly adjusted totals. Totals represent sum of unrounded figures and may vary from sum of rounded amounts. See "Explanation of Statistics" for additional information on coverage, definition of export and import valuations, and sources of further information.

October.....	18,410.9	28,063.8	26,782.7	-9,652.9	-8,371.8
November.....	18,394.7	28,616.6	27,331.3	-10,221.9	-8,936.6
December.....	19,142.4	27,175.7	25,933.1	-8,033.3	-6,790.7

Note: The monthly and calendar year totals shown in this table are derived by adding the commodity components as shown in export table 3 and import tables 4 and 5.

[1]Export and import statistical series are adjusted for seasonal and/or working-day variation but not for changes in price level. The adjusted monthly export and import totals for 1984 and 1985 presented in this report are derived by adding the seasonally adjusted components (i.e. SITC sections). The factors used to adjust the 1984 and 1985 component series represent the combination of seasonal adjustment factors developed from monthly data through 1984 and the appropriate working-day factors. Prior to January 1979, monthly totals were adjusted independently of the components. Effective with January 1986 statistical month, the practice of adjusting exports and imports for seasonal and working-day variation will be discontinued.

[2]Cumulations of data over at least 4-month periods are desirable to identify underlying trends. Month-to-month changes in exports, imports, and similar series often reflect primarily irregular movements, differences in monthly carryover, etc. Recent month-to-month percent changes in the overall seasonally adjusted export and import series are presented in the following tahle with average percent month-to-month rise and decline over longer periods shown for comparison. The averages exclude percentage changes for periods when negligible changes (zero percent) in the level of exports/imports occurred.

Series	Recent month-to-month percent change				Average month-to-month percent change			
	Oct.-Nov. 1985	Sept.-Oct. 1985	Aug.-Sept. 1985	July-Aug. 1985	Average rise 1980-1984	Average decline 1980-1984	4 months Aug.-Nov. 1985	12 months Nov. 1984-Nov. 1985
F.a.s. export value....	+3.5	-2.1	+1.8	+0.1	+3.7	-2.5	+0.8	-0.1
C.i.f. import value....	+9.8	-13.4	+21.8	-2.2	+6.3	-6.1	+4.0	+1.2

NOTE: Effective with July 1984 statistics, the seasonal and/or working-day adjustment factors applied to the export and import commodity groupings data shown in table 2, parts D, E, and F will be updated on an rotating basis at the beginning of each quarter. The adjustment factors applied to data shown in table 2, parts A, B, and C will continue to be updated only at the beginning of each calendar year.

Table 3. U.S. Exports of Domestic and Foreign Merchandise by Statistical Month: January 1984 to November 1985

(In millions of dollars. Data are on a f.a.s U.S. port of exportation value basis. See "Explanation of Statistics" for information on coverage, definition of the export valuation, description of the Schedule E commodity sections and sources of further information. Unadjusted data should be used for annual totals therefore, seasonally adjusted annual totals are not shown. Totals represent sum of unrounded figures and may vary from sum of rounded amounts)

[1] Merchandise entering the United States as imports and which at the time of exportation are in substantially the same condition as when imported.

[2] Represents only export shipments from the United States and differ from the Department of Defense (DOD) Military Assistance Program Grant-Aid shipments under this program as follows: (a) transfers of the material procured outside the United States and transfers from DOD overseas stocks are excluded from export shipments; (b) export value is f.a.s. U.S. Port of Exportation whereas DOD value, in most instances, is f.o.b. point of origin; (c) data for shipments reported by the DOD for a given month are included in Bureau of the Census reports in the second month subsequent to the month reported by the DOD.

[3] Adjusted for seasonal and working-day variation, but not for changes in price level. Adjustment factors have not been applied to data for sections 0, 1, 3, 4, 9 and foreign merchandise due to the absence of identifiable seasonal patterns. The sum of seasonally adjusted sections 0-9 plus foreign is shown in table 1, column 1.

Table 4. U.S. General Imports of Merchandise by Statistical Month: January 1984 to November 1985

(In millions of dollars. Data are on a c.i.f U.S. port of entry value basis. See "Explanation of Statistics" for information on coverage, definition of the import valuation, description of the Schedule A commodity sections and sources of further information. Unadjusted data should be used for annual totals therefore, seasonally adjusted annual totals are not shown. Totals represent sum of unrounded figures and may vary from sum of rounded amounts)

[1] Adjusted for seasonal and working-day variation, but not for changes in price level. Adjustment factors have not been applied to date for sections 0, 1, 3, 4, and 9 due to the absence of identifiable seasonal patterns. The sum of seasonally adjusted sections 0-9 is shown in table 1, column 3.

Table 5. U.S. General Imports of Merchandise by Statistical Month: January 1984 to November 1985

(In millions of dollars. Data are on a Customs value basis. See "Explanation of Statistics" for information on coverage, definition of the import valuation, description of the Schedule A commodity sections and sources of further information. Unadjusted data should be used for annual totals therefore, seasonally adjusted annual totals are not shown. Totals represent sum of unrounded figures and may vary from sum of rounded amounts)

Period	Schedule A sections										Total (Sections 0-9)

[1] Adjusted for seasonal and working-day variation, but not for changes in price level. Adjustment factors have not been applied to data for sections 0, 1, 3, 4, and 9 due to the absence of identifiable seasonal patterns. The sum of seasonally adjusted sections 0-9 is shown in table 1, column 5.

Table 6. Summary of General Imports of Petroleum and Selected Products Into the U.S. Customs

(See "Explanation of Statistics" for information on coverage, definition of the import valuation, and sources of further information. A list of the Tariff are required to be reported in either pounds, short tons or long tons are included in this table on a 300 pounds per barrel basis. Totals represent sum of shown. BPD Represents average num-

Note: The revised statistical month includes data for all documents received within 45 days after the end of the month and combines the value of current month transactions in that statistical month with the value of current month transactions from the subsequent statistical month plus a small additional carry-over from earlier months. For example, the revised statistical figure for August consists of actual August transactions included in August and September statistical months plus a small additional carry-over from earlier months. The 1984 value complied subsequent to August 1985, amounts to 0.007 percent of the calendar year total. Revised 1985 statistical month totals appear in Table 1B.

Appendix 2 U.S. EXPORTS - UNADJUSTED DATA, BY MONTH:
January - November 1985

In millions of dollars. Totals represent sum of unrounded figures and may vary from sum of rounded amounts. Data are neither adjusted for seasonal nor working-day variation nor for changes in price level. Exports are f.a.s. "free alongside ship at U.S. port of exportation value basis" and exclude U.S. Department of Defense (DOD) Military Assistance Program Grant-Aid shipments but include reexports. NA - Not Available.
